

Framework for Context Specific Dose Response Assessment for Risk Assessment

Lynne Haber, TERA

Framework Vision

- ▶ Guide risk assessors to a variety of dose–response assessment methods relevant to a range of decision contexts
 - Illustrated by case studies
- ▶ Aid in selecting methodology for dose–response analysis
- ▶ “One–stop” shopping for risk methods and guidance, key publications
 - Access to key guidances, methods and examples of implementation with additional information on utility and issues
 - <http://www.allianceforrisk.org/Workshop/Framework/ProblemFormulation.html>

Goals

- ▶ User-friendly
- ▶ Self-explanatory
- ▶ Aid in identifying needed resources

Panel Discussion Questions

- ▶ What changes to the framework (changes in structure, additional information provided, etc.) can help the framework to fulfill the goal?
- ▶ Should the framework more overtly reflect the panel recommendations? If so, how?
- ▶ Please comment on the appropriateness of linking to the materials and other guidances in appendix 4 of the discussion questions (post-meeting written comments may be best).
 - ▶ Are there other key guidances or publications that should be included?
